

## **Awareness Programme on Balanced Fertilizer Application and Integrated Nutrient Management (INM) under the MGGM Programme**

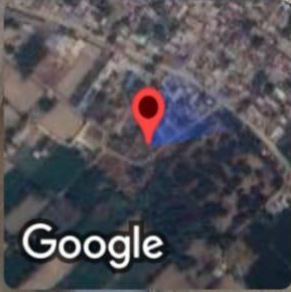

An Awareness Programme on Balanced Fertilizer Application and Integrated Nutrient Management (INM) under the MGGM Programme was successfully organized on 19 May 2026 in Shajanpur and Mehtarpur villages by Team 21. The programme aimed to create awareness among farmers regarding the scientific and balanced use of fertilizers for sustainable agricultural development and improved soil health. A total of 30 farmers actively participated in the programme and interacted with the experts on various aspects of nutrient management and sustainable farming practices.

During the programme, farmers were informed about the importance of balanced fertilizer application and the need to integrate organic manures, bio-fertilizers, crop residues, and chemical fertilizers for maintaining soil fertility and enhancing crop productivity. The experts emphasized the significance of soil testing for determining crop nutrient requirements and explained how proper nutrient management can reduce input costs, improve soil health, and minimize environmental pollution caused by excessive use of chemical fertilizers.

The programme was conducted by Dr. Raghvendra Singh, Dr. Rajesh Rathore, Dr. Harshit Verma, Dr. Sonalika Mahajan, Dr. Anshuk Sharma, and Dr. Neha Joshi. The team members addressed farmers' queries related to fertilizer management, sustainable agriculture, and soil health improvement. Farmers appreciated the informative session and expressed interest in adopting the recommended Integrated Nutrient Management (INM) practices for better agricultural productivity and long-term sustainability.
